# Block the Sun, Not the View

*Solar Screen fabrics are designed to control light*

without eliminating it. Like sunglasses for your windows, solar screen fabrics reduce glare while allowing excellent view to the outside.

*Insolroll fabrics enhance everyday life...*

Light-colored fabrics provide more heat reduction and diffuse interior light.\*

Dark-colored fabrics provide more glare reduction and better view-through.\*

SilverScreen's highly reflective surface creates a fabric that outperforms all others at reducing heat, controlling glare and retaining view regardless of color choice.\*

Opaque or translucent fabrics provide light management when privacy or room-darkening are needed.\*
