Block the sun, not the view

Imagine tempering the sun without blocking the view. Retractable shades, using a densely woven solar screen fabric, roll down to provide protection from the harsh sun. Our unique solar screen fabric allows natural light to enter your home and create an open feeling while still blocking the sun's heat. Solar screens can be automated with sun and wind sensors to provide total protection for your decor, even when you are not at home.

Enjoy your patio even when the sun is setting.

How Solar Screens work:

110 volt AC tubular motor OR crank and gear operator

Fully enclosed aluminum headbox protects fabric when retracted; available in white, bronze and tan.

Insolroll's specialized fabrics for exterior solar screen shades range from 3% to 14% openness to control varying degrees of sun exposure.

Reinforced bracket design for large patio installations

Reinforced, welded edges provide increased fabric durability

Track Guide

Cable Guide & Hem Bar

Choice of track or cable guide system to secure fabric

Aluminum side channel with vinyl insert to increase durability; available in white, bronze and tan.

Fabric wrapped teardrop-shaped aluminum hem bar (Cable guide system featuring stainless steel aircraft cable with UV coating shown; deck mount available)

Exterior Headbox Finish Options
